GAME RULES

- 1 Place the rabbits, foxes and mushrooms on the game board as indicated in the challenge.
- 2 The object of the game is to move the rabbits and foxes around the gameboard until all of the rabbits are safe in brown holes.
 - A Mushrooms are stationary and cannot be moved.
 - B Foxes move by sliding forward or backward. Foxes cannot jump over obstacles or be placed elsewhere on the board.
 - C Rabbits move by jumping horizontally or vertically over one or more spaces with obstacles (other rabbits, foxes, mushrooms or a combination of these):
 - Rabbits must land on the first empty space after a jump - they can never move over empty spaces.
 - Rabbits can never move without jumping over at least 1 obstacle, thus they can never move to an adjacent space.
 - A hole with a rabbit inside is an obstacle, while empty holes are not obstacles.
 - A rabbit can jump into – but not over – an empty hole.
 - If needed, rabbits can jump out of holes they are already sitting in.
 - Rabbits can jump over a fox no matter the orientation of the fox: tail to front, front to tail, or over the side.
- 3 You have found a solution when all of the rabbits are inside brown holes!
 - The minimum number of moves needed to solve each challenge is indicated above each challenge.
 - The shortest solution can be found at the end of the challenge booklet. Other solutions are possible.
